Place an arrow beside the drawing to show the direction the object was moving.

18. The edges of the object were:

19. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

20. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

24. In order that you can give as clear a picture as possible of what you saw, we would like for you to imagine that you could construct the object that you saw. Of what type material would you make it? How large would it be, and what shape would it have? Describe in your own words a common object or objects which when placed up in the sky would give the same appearance as the object which you saw.

32. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it.

33. In the following larger sketch place an "A" at the position the object was when you *first* saw it, and a "B" at its position when you *last* saw it. Refer to smaller sketch as an example of how to complete the larger sketch.

Dear Sir:

Probably what I saw just a moment
a surge of a star, but I think it was
a missile (fired probably a few seconds before impact)
sight. You also think this is a logical solution or
dream but I actually saw it.

About 8 min. to 10 (P.M.) I spotted an object
rising steadily in the sky. The progress of this
"object" is shown below

completely invisible.
barely visible probably
extending into atmosphere
growing steadily
(at least here)

very bright (light blue)

Thank-you for your attention (and if
this is top secret tell me about it) after
I'll be to the point.

Yours truly,

About 8 o'clock on the night of April 22, I was walking our dog and looking for our cat. It was on the corner of Odell and Mulford that something inside made me look up. About ten miles to twenty miles distant an object that of a bright star, was moving slowly upward increasing speed. What brought out my attention was that it made no sound, and the brightness neither increased nor decreased. I saw no signal lights like that of an airplane, and no exhaust like that of a jet. It set me to thinking, so I immediately went into our house sat down and wrote the note that was in the next day.
